The Trusted Authority in Digital Dental Manufacturing

Supporting Digital Dental Manufacturing with High-Quality Products and Unequaled Support.

Axsys Dental Solutions is an independent professional services company focused on providing the best possible hardware and software technology along with industry-leading training and support services specifically for the design and manufacture of dental prostheses.

Axsys is unique in the business as we are one of the few, if not the only distributor of digital dental technology whose business is solely focused in this area.
ABOUT AXSYS INCORPORATED

Axsys Incorporated provides digital technology solutions from the leaders in CAD/CAM software. For over 24 years Axsys has helped literally thousands of clients in every industry—from one-man shops to Fortune 500 companies—successfully implement sophisticated CAD/CAM/CNC systems, increase productivity and realize greater profits. We couple this unique capability with experienced dental professionals to provide our clients with a distinct advantage—what we call the Axsys Advantage.

Our associates have been involved in digital manufacturing since 1978, long before anyone ever heard of CAD/CAM. It’s in our blood—a large part of our DNA.

We focus on providing open, digital dental solutions to dental professionals throughout North and South America.

Our products include a full-line of CAD/CAM/Scanning software, 3D scanners, milling machines, 3D printers, tooling, furnaces, hard & soft materials and FDA-cleared implant components.

Our services combine a proven, focused approach with real-world expertise to deliver total solutions that enable our customers to realize their business and profitability objectives.

Solutions for Dental Laboratories and Milling Centers
In the ever-changing world of digital dentistry, dental laboratories and milling centers must be able to quickly process increasingly more complex cases containing a wide variety of dental indications and material options and must also be equipped to deal with even more out-of-the-box CAD/CAM supported cases in the future. Our expert support together with our robust and flexible combination of software and hardware components, provides our clients the ability to meet these requirements and fabricate virtually any patient-specific dental prosthesis.

These capabilities coupled with our wide range of right-priced materials and consumables enable our clients to effectively and profitably compete in a highly demanding and volatile business environment.

Solutions for Dental Practices
Old paradigms are changing. Traditional impressions are being replaced by scanning and more laboratory procedures are performed in the dental office. Technology makes it very practical and very cost effective. Our InPractice® Digital Dental Suite featuring our Versamill Precision Dental Machining Center is a practical and cost-effective open-source solution whose versatility, power, speed and precision set it apart from the rest.

Implementing InPractice® means you can provide your patients with the full spectrum of dental restorations, from the thinnest ceramic veneers to a complete oral rehabilitation. From diagnostic wax-up prototypes and acrylic occlusal splints to custom titanium abutments and full-arch bars.

Our Services
One of the key components in the successful implementation of digital dental technology is the partner you choose to supply you with the technology and just as importantly, implement and support you in the ongoing use of the technology in your organization.

Our extensive in-house technical resources have hundreds of man years of experience putting CAD, CAM and CNC solutions to work for literally thousands of customers. This allows us to draw on a wide range of industry and systems experience while supporting you in the use of our products.

Sound Investment
Through any combination of Axsys services and products, we will help you optimize your product, tooling and restoration creation process. We will help you to speed your time-to-market, increase your efficiency and achieve high, predictable profits.

The DNA of Success:
Only Axsys Dental Solutions has all the DNA elements required to assure your success. We are your trusted advisors, just as we are to literally thousands of others, providing complete solutions, building relationships, accelerating your business development and your path to productivity.

Information Technology & Systems Integration
What if your solution partner was versed in all layers of all systems within an organization—from the physical hardware to the operating systems, applications, databases, storage, servers and more.

CAD/CAM Software Development & Support
Imagine if your partner actually had over 30 years of experience developing, supporting, training, and using CAD/CAM software.

Machining and Manufacturing
Imagine having a supplier who can reference over 40 years of extensive machining and manufacturing experience across many industries.

CNC Machine Service, Instruction & Production
Imagine having a supplier that could actually service the machines they provided.
