

Minutes matter. We keep you milling

AVOID COSTLY DOWNTIME WITH OUR EXCLUSIVE PROGRAM

Our RapidReplace (RRS) Service delivers prompt and effective solutions to maintain equipment availability and maximize up-time. The RRS program provides a direct

replacement immediately after a case has been opened and it is determined that a replacement is required.*

**Subject to program Terms and Conditions.*

"Our lab has been involved in CAD CAM since 2006. We have utilized many of the big brand companies in the past. Switching over to Axsys for our CAD CAM needs has been the best move we've made. Fantastic quality and unrivaled service is the least I could say about our experience..."

For the duration of the included 2-year limited warranty, our clients merely call our toll-free support line to log a support call. At that time, if the problem cannot be diagnosed and repaired during the call, they may receive a RMA number for the return of the machine and a replacement machine is sent priority air at no charge. The client then has 14 days to return the defective machine in the supplied container and is responsible for cost of return shipment.

Your benefits include:

- Increased availability and maximized uptime.
- Fast and predictable solution.
- Cost known upfront.
- New to almost new condition, with the latest hardware and software enhancements.
- Current warranty dates are maintained.
